## VISION

The intent of BabyEthereum 2.0 is to allow investors to collect \$BNB while holding \$.BabyEth2.0 There are relatively few businesses using this business model. A potential hit token Project in the cryptocurrency. donate and help those in need and all countries that are going through many problems. that merit our support

BabyEthereum 2.0 have Three functions occur during each transaction: \$BabyEth redistribution, Auto Liquidity Pool Acquisition and \$token for holder.

BabyEthereum 2.0 is completely decentralized and all decisions are made by community poli. Giving developers a better understanding on planning BabyEth 2.0's future. No team token is given to the members.

At launch, we will send 22% of the total supply to burnt address.

## ECOSYSTEM:

\$ BabyEthereum 2.0

BabyEthereum 2.0 will be released on the basis of binance smart chain platform and fully comply with bep20 \* standard.

Support of this standard guarantees the compatibility of the token with third-party services (wallets, exchanges, listings, etc.), and provides easy integration.

Máximum supply: 1 Quadrillion BabyEthereum 2.0

### 6% Auto Liquidity Pool

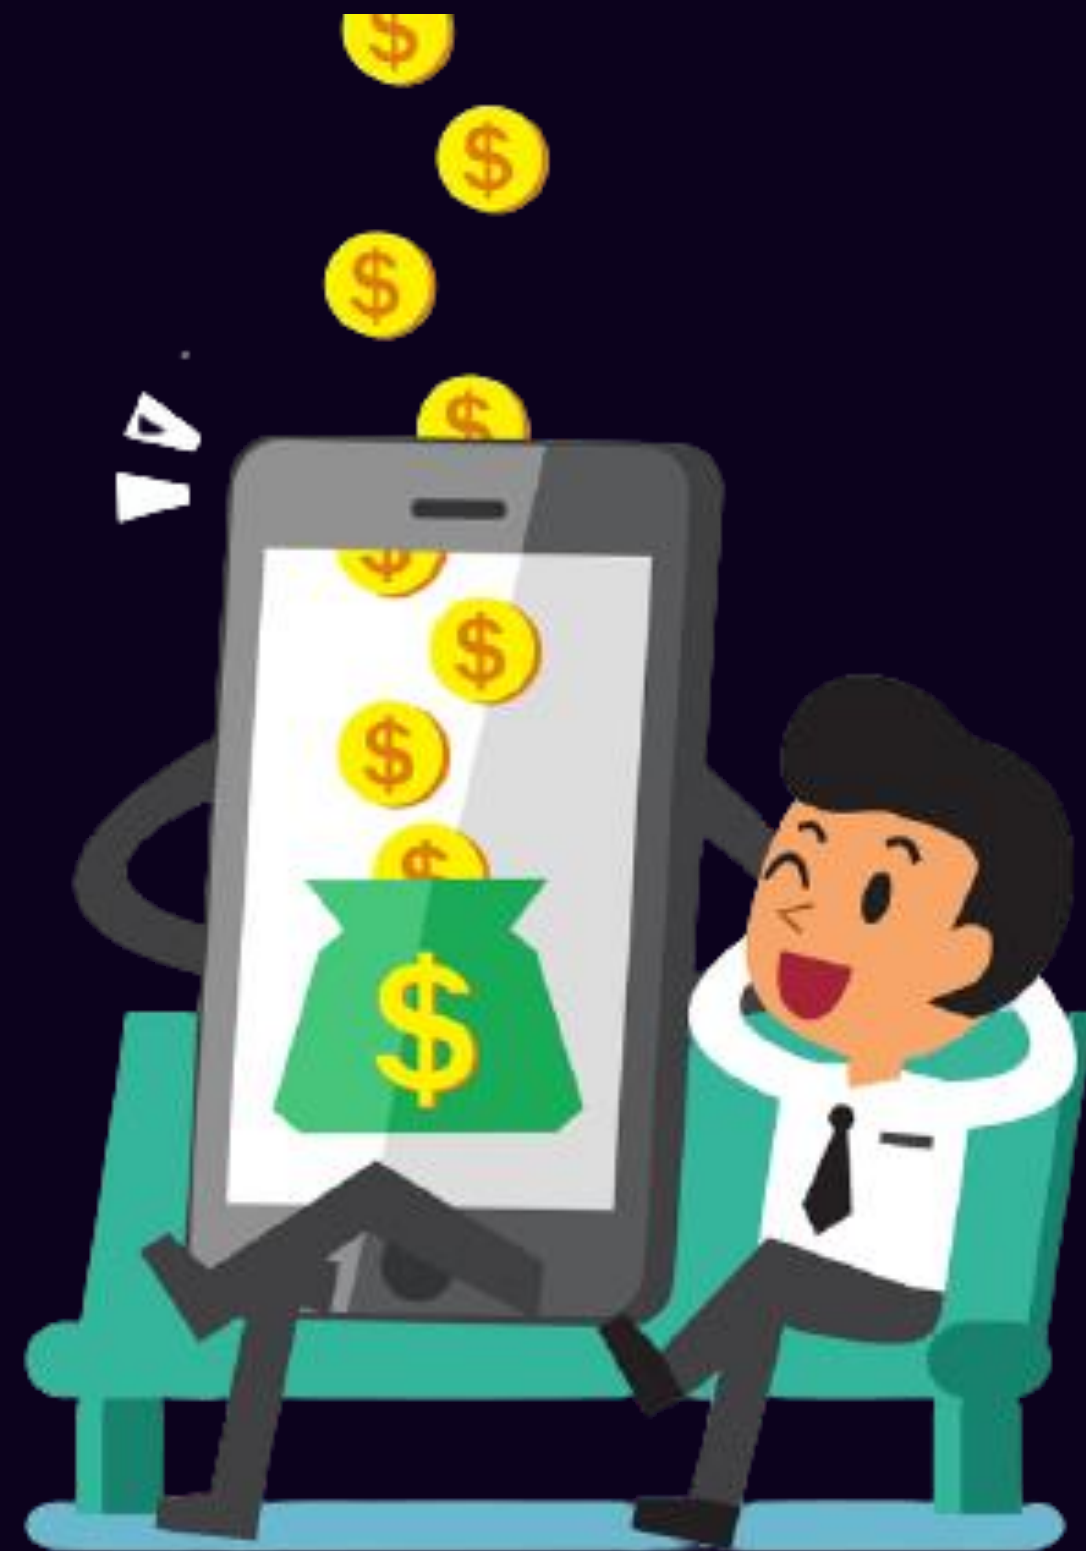

Every trade contributes towards automatically generating liquidity that goes into the PancakeSwap Pool.

### 4% Redistribution into \$Token

of every transaction is taken and redistribution to all Baby Ethereum 2.0 holders automatically winning all the time

## HOW DO I EARN BNB BY HOLDING BabyEthereum 2.0

This unique model will take out 4% of every transaction (buy/sell) and held within the smart contract

Collection amount of BNB is based on the amount of BabyEth2.0 the holder owns. If you had 2% of BabyEthereum 2.0 supply, you are eligible to collect 1% of the BNB Reward pool

If holder collected more than 2 \$BNB, 10% of the collection will be used to buy BabyEthereum 2.0 on PancakeSwap and send to burnt address immediately. This reduces BabyEth 2.0 supply and increases the value

## TOKENOMICS

- **Token name:** BabyEthereum 2.0
- **Symbol:** BET2
- **Total Supply** 1,000,000,000,000,000
- **TAX** 10%
- **Auto Liquidity** 6%
- **HOLDER** 4%
- **SLIPPAGE** 12%
- Liquidity Locked
- 22% Initial Burn
- manual burning

6% Auto Liquidity Pool

4% Redistribution for holder

# Roadmap

- BabyEthereumSwap (Decentralize Exchange)
- Initial CEX Listings (Hotbit, Bilaxy, Bitstamp )
- 15,000 Telegram Members
- 30,000 Holders
- Second audit.
- BabyEthereum2.0 Farm
- v2 Website launched with SWAP features and wallet
- involving celebrities in promo.

- Coin Launch!
- Website Launch! (v1)
- Initiate an aggressive marketing push
- Reward community with airdrop
- Pre Sale Dxsale
- 1,000 Holders
- CoinGecko Listing
- 2,000 Telegram Members
- Marketing Campaign
- 3,000 Holders
- Apply for CMC
- doxed
- First audit

- More CEX Listings
- 50,000 Telegram Members
- 90,000 Holders
- Influencer Marketing Partnerships

- first donations to aid organizations
- 5,000 Telegram Members
- AMA
- 9,000 Holders
- 10,000 Telegram Members
- 18,000 Holders

## BabyEthereum2.0 Airdrop System?

BabyEthereum 2.0 Airdrop System is an efficient tool for sending airdrops to a large (or small) group of addresses. It bulk processes transfers into a small number of transactions, and distributes tokens for minimal fees. These fees earned will be used for either marketing purposes or to buyback BabyEthereum 2.0.

Airdrops are technically referred to as batch transfers. Batch transfers are used to save time and eliminate errors when performing a number of functions. We use batch transfers to facilitate airdrops, distribute bounties from successful bounty campaigns, token giveaways, and even to distribute coins.

## What are Batch transfers used for?

Due to the design of Ethereum, batching transactions (outside of state channels) is more about saving time and eliminating error than saving fees on gas. A batch transaction tool is helpful for any general transaction that requires sending tokens to multiple addresses. **It is most often used to conduct:**

- Bounty Campaigns
- Airdrop Campaign

## Why is it important?

In order for a token to succeed it needs to have a market of buyers and sellers. Without supply and demand, it won't go anywhere. Batch transfers are pivotal to a token's success in this sense, if you can't distribute your token to excited users, there's no point in developing it in the first place. Another way to think about the importance of batch transfers is in terms of the technology itself. The growing utility of the Ethereum ecosystem requires this functionality.

BabyEthereum2.0 Airdrop ecosystem healthy, that is why we will be doing massive airdrops to build publicity and bring strong holder BabyEthereum2.0.

## BabyEthereum 2.0 Wallet

An integration of decentralized browser applications and allows users to link their wallet and purchase other cryptocurrencies.

## BabyEthereum 2.0Farm

Merchandise platform that allows holders to buy and integration system which allows others to sell on our platform. 5% will go to Charity. integrating Cryptocurrency payment into the website, allowing holders to connect MetaMask and/or Trust Wallet to do transaction

# BabyEth2.0 Swap

BabyEth2.0Swap is our decentralized exchange platform that helps people easily swap any BEP20 token for BabyEth token. It is backed by PancakeSwap, the biggest BEP20 DEX platform in the world. The more and the longer BabyEth token you hold, the more benefits you will get!
